Key Features

- images of the properties
- interactive maps
- detailed listings
- CMS

Sellers and agents can:

- update property info
- upload photos
- Speak with potential buyers

The goal of our website is to provide a comprehensive tool for real estate agents to efficiently market their listings and for buyers to find their dream home with ease.
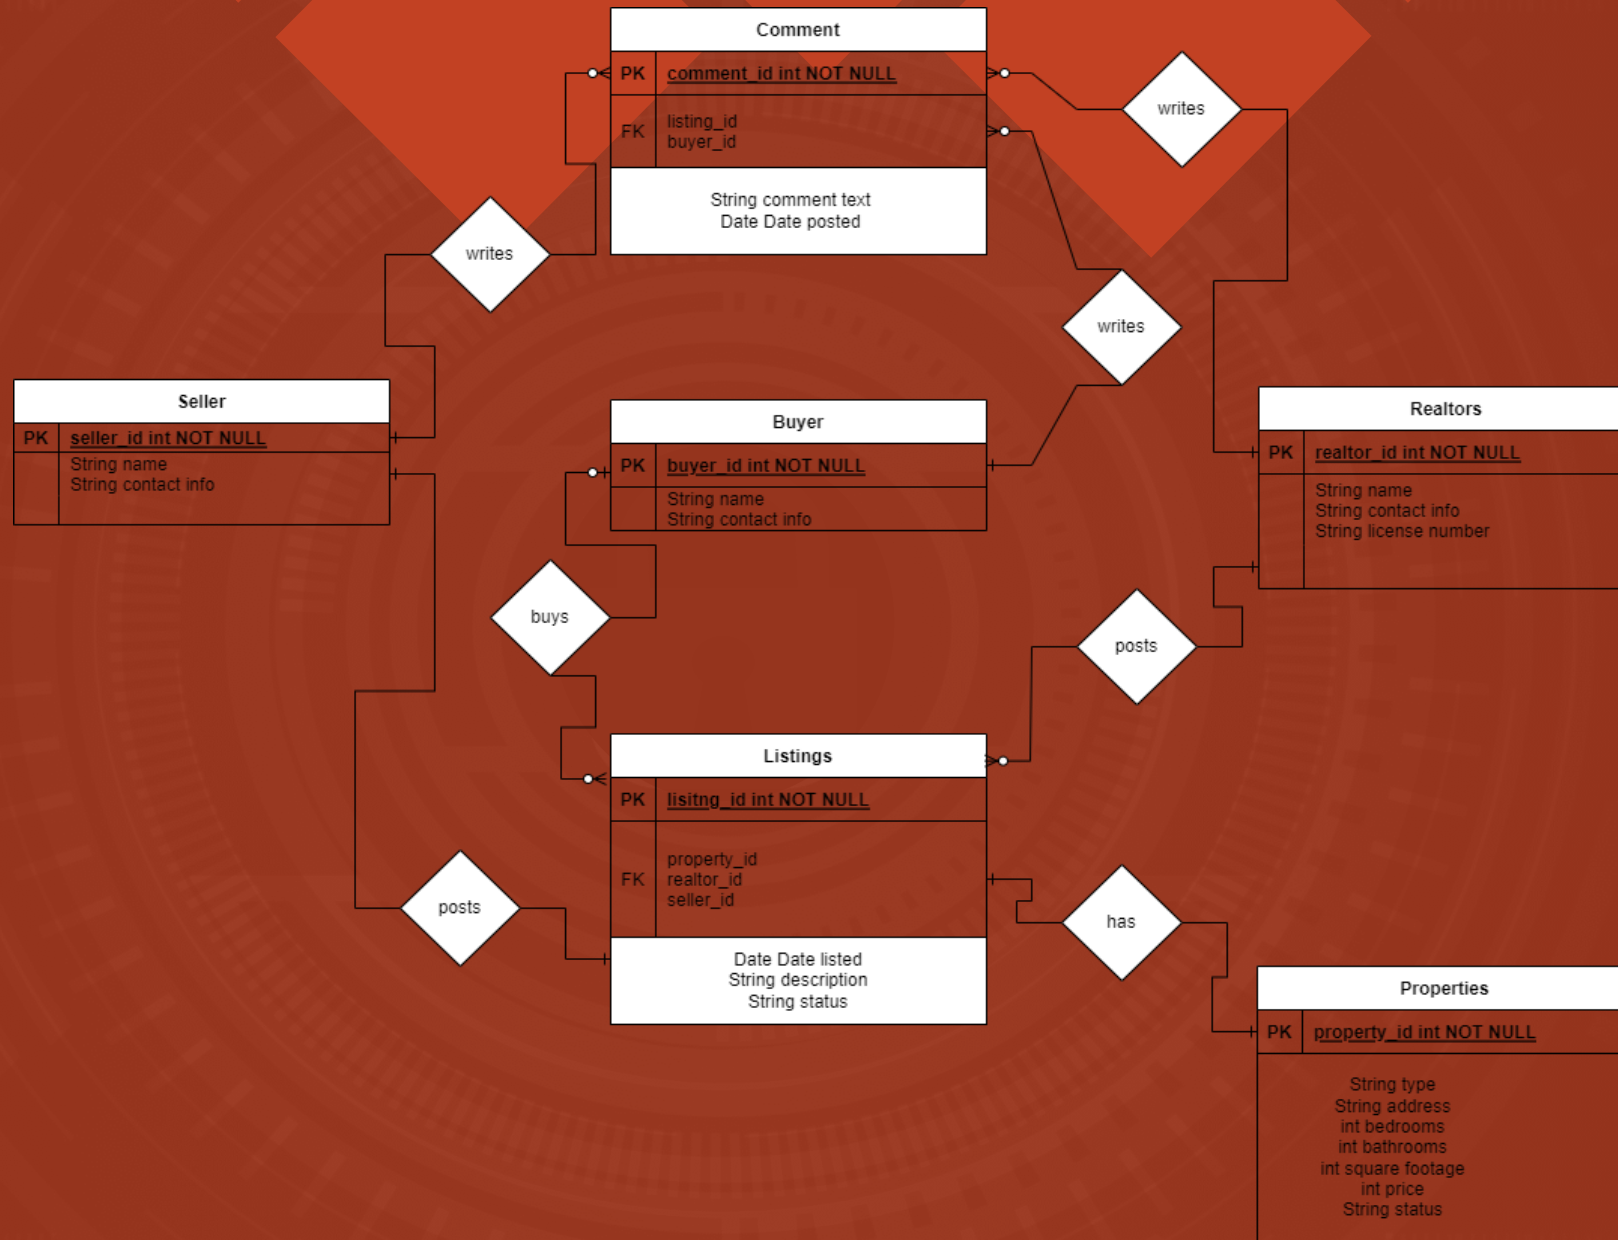

The user-friendly Content Management System (CMS) is designed to streamline property management for real estate professionals and enhance the experience for those buying a house, apartment, condominium, or any other kind of property.

ASE230 Real Estate Listings Website

Use search filters to help buyers narrow down their choices for their perfect home. Filters will have criteria such as location, price range, property type, school district, etc
